Dear Sirs

I am greatly concerned regarding the amount of house building planned in and around Banchory in the future. It will be such a loss of land never to get back again which will affect so much of the open green spaces we enjoy and particularly the wildlife, red squirrels, roe deer, badgers and bird life which have made their 'homes' here.

Another concern is that each of these properties has the potential to be a two car family which will add to the worry of more pollution in our area. Makes little sense when there is constant discussions regarding the environment becoming cleaner!

Recently there seems an increase in tree cutting and some land clearance near upper Woodside road. Surely there are not going to be houses built there!

Please do your utmost to curtail some of these plans to retain as much as possible the natural woodlands we all enjoy.

Yours faithfully
