Peterhead Harbour

Data Zones Within the Intermediate Zone

Relevant Multi-Member Wards

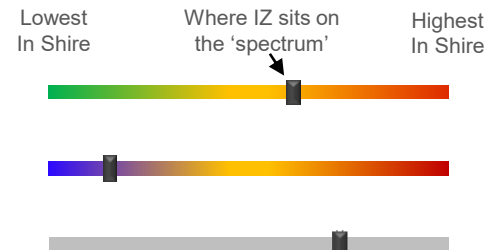

Notes on the Maps

The map on the left shows the location and the geographic area of the Peterhead Harbour Intermediate Zone which contains eight Data Zones. The IZ lies within Ward 5, Peterhead North.

Spectrum Charts Explained

The following statistical pages frequently utilise spectrum charts as a visual aid to accompany an indicator. They are used to place the relevant Intermediate Zone (IZ) in the context of all other IZs in Aberdeenshire with regards to that indicator.

The charts to the right are examples of the spectrum charts used in this report. The black line represents where the IZ sits in the context of the highest and lowest figures in Aberdeenshire. If the black line is situated towards the left-hand side, the IZ recorded one of the lowest figures in Aberdeenshire. Conversely, if the black line is towards the right-hand side, it recorded one of the highest figures in Aberdeenshire.

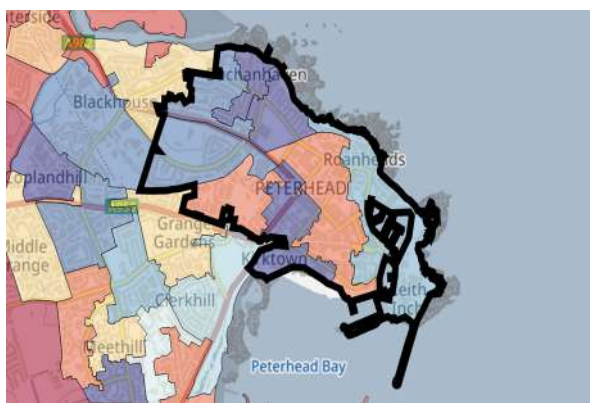

The green/red spectrum charts are the most common type. If the black line is situated towards the red end of the spectrum, it means the figure is objectively worse than most other IZs in Aberdeenshire and *vice versa*.

The blue/red spectrum charts are used in the demographic section to denote high population growth (red) and population decline (blue).

The grey spectrum charts are simply used to denote high and low in the context of Aberdeenshire, where the high / low figure is neither good nor bad. An example would be the proportion of dwellings that fall within Council Tax Bands F-G.

## Peterhead Harbour Demographic Data

Map of Peterhead Harbour: Population Change (2014-2021)

Low Growth / Depopulation (Blue) High Growth (Red)

The population of the Peterhead Harbour IZ decreased by 7.5% between 2014 and 2021. This is mainly down to the population shifts in DZ S01007088 where there was a decrease of 83 (15.0%) and DZ S01007085 where there was a decrease of 112 (13.9%).

Compared to 2014 Peterhead Harbour has seen significant decreases in the younger age groups especially with the 0-9 age range with a 27.3% decrease and a 34.6% decrease with 20-29-year-olds.

At 65.5%, the proportion of Working Age people in the IZ is right at the top when looking at the spectrum in an Aberdeenshire context.

At 17.6%, there is an average proportion of children in the IZ is than in most other areas across Aberdeenshire.

At 16.3% the number of older residents in the IZ is lower than most other areas of Aberdeenshire even with the small spikes in population change among the 70+ age range.

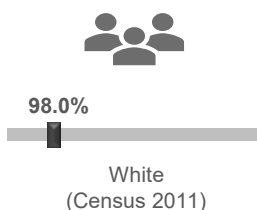

Population Change per Data Zone, 2014 & 2021

Data Zone	2014	2021	% Difference
S01007081	956	866	-9.4%

Maternal obesity	33.5	9.1%		7.4%	Up	% of women at antenatal booking
Patients (65+) with multiple A&E hospitalisations	8124.5	29.1%		19.1%	Up	Rate per 100,000 pop.
Patients hospitalised with asthma	54.5	70.5%		-20.4%	Down	Rate per 100,000 pop.
Patients hospitalised with COPD	300.3	156.6%		44.7%	Down	Rate per 100,000 pop.
Patients hospitalised with coronary heart disease	323.2	9.9%		-5.4%	Down	Rate per 100,000 pop.
Patients with emergency hospitalisations	7879.5	49.2%		8.9%	Up	Rate per 100,000 pop.
Premature births	6.9	-2.4%		-1.4%	Up	% of all live births
Uptake of the HPV vaccine in S3 girls	72.9	-16.5%		-11.9%	Down	% of S3 girls

Based on the 24 health-related indicators in the table, this IZ is situated at the more vulnerable end of the spectrum (2) in an Aberdeenshire context. The IZ fares slightly better when all IZs in Scotland are taken into consideration, but it is still well outside the top half nationally (26).

The area compares favourably to most other areas in Scotland in terms of Patients hospitalised with coronary heart disease and Immunisation uptake at 24 months – MMR.

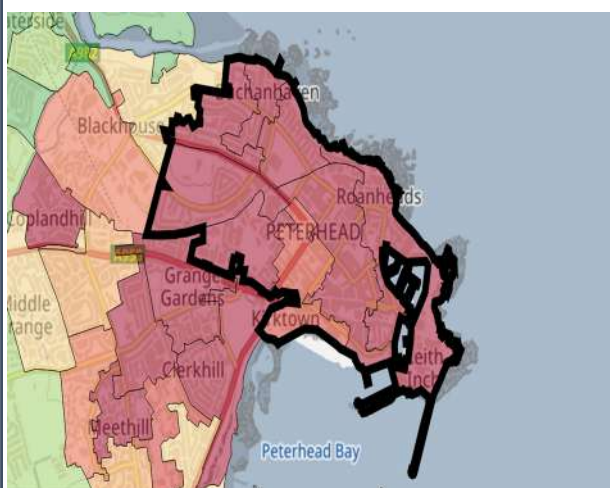

Issues that may require further investigation include:

- Female Life expectancy
- Bowel Screening uptake
- Deaths all ages
- Child Dental health in Primary 1
- Child Dental health in Primary 7

With regards to each of the indicators listed above the IZ compares less favourably to other areas in Aberdeenshire and, in some instances, Scotland (and/or the trend is worsening).

## Peterhead Harbour Economic Data (1 of 3)

### Rank of Household Income per Data Zone (2023)

In terms of household income, this IZ is among the poorest in Aberdeenshire. The median household income in 2023 equated to £23,459 which is £18,297 lower than the Shire average (£41,756).

Median household income ranges from £19,960 in DZ S01007083 to £28,139 in DZ S01007085.

Approximately 13.8% of households in this IZ earn less than £10,000 per year, which is higher-than-average (5.3%). This equates to roughly 393 households.

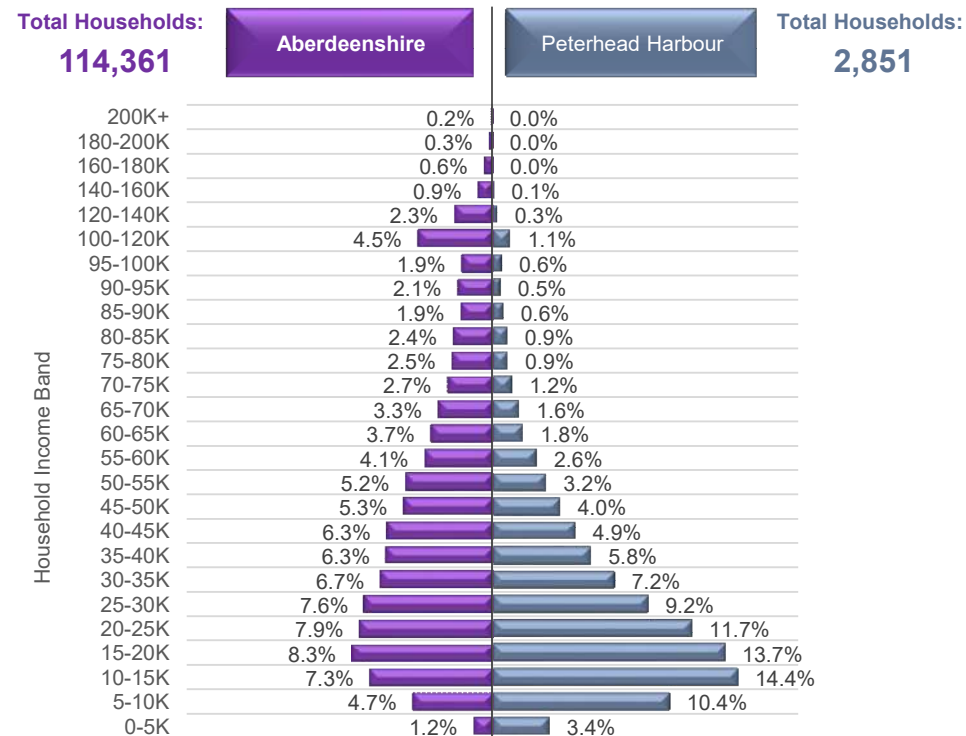

In addition, Approximately 1.5% of households in this IZ earn more than £100,000 per year, which is lower than average (10.1%). This equates to roughly 43 households.

### Household Income per Data Zone (2023)

Data Zone	Households	Average Income	Median Income	Lower Quartile Income
S01007081	356	£ 33,921	£ 27,480	£ 16,374

Alternative Claimant Count - Effective 'Unemployment Rate'

Children in Low Income Families

Summary

The number of people claiming Universal Credit (UC) - who are also in employment - has remained relatively steady over the last few months, contrary to the Shire-wide trend, which has increased. Latest figures show 10.1% of people aged 16-64 (who also have jobs) are claiming UC. This is towards the top end of the spectrum in a Shire context. A similar picture emerges in relation to people on UC and not in employment.

Unlike Aberdeenshire, the unemployment rate in the IZ has risen substantially since the September 2020 peak of 3.8%. Latest data suggests approximately 6.1% of the Working Age population is currently out-of-work, which is three times the Aberdeenshire rate (1.8%).

Children living in low-income families are relatively uncommon.

However, The numbers in this IZ are serious concern and suggest the issue may be coming more to the fore over recent years, particularly since 2020/21.
