Notes on the Maps

The map on the left shows the location and the geographic area of the Fraserburgh Lochpots Intermediate Zone. Only one Ward straddles the Intermediate Zone - Ward 3, Fraserburgh and District. There are four Intermediate Zones with the Fraserburgh settlement.

Spectrum Charts Explained

The following statistical pages frequently utilise spectrum charts as a visual aid to accompany an indicator. They are used to place the relevant Intermediate Zone (IZ) in the context of all other IZs in Aberdeenshire with regards to that indicator.

The charts to the right are examples of the spectrum charts used in this report. The black line represents where the IZ sits in the context of the highest and lowest figures in Aberdeenshire. If the black line is situated towards the left-hand side, the IZ recorded one of the lowest figures in Aberdeenshire. Conversely, if the black line is towards the right-hand side, it recorded one of the highest figures in Aberdeenshire.

The green/red spectrum charts are the most common type. If the black line is situated towards the red end of the spectrum, it means the figure is objectively worse than most other IZs in Aberdeenshire and *vice versa*.

The blue/red spectrum charts are used in the demographic section to denote high population growth (red) and population decline (blue).

The grey spectrum charts are simply used to denote high and low in the context of Aberdeenshire, where the high / low figure is neither good nor bad. An example would be the proportion of dwellings that fall within Council Tax Bands F-G.

Fraserburgh Lochpots Demographic Data

Map of Fraserburgh Lochpots: Population Change (2014-2021)

Low Growth / Depopulation (Blue) to High Growth (Red)

The population of the Fraserburgh Lochpots IZ decreased by 12.4% between 2014 and 2021. This is mainly down to the population shifts in DZ S01007118 where there was a decrease of 107 (15.9%) and DZ S01007119 where there was a decrease of 117 (15.0%).

Compared to 2014 Fraserburgh Lochpots has seen significant increases in the older age groups especially with the 70+ age range with a 55.3% increase with 70–79-year-olds.

At 61.1%, the proportion of Working Age people in the IZ is just around the average when looking at the spectrum in an Aberdeenshire context.

At 18.5%, there is an average proportion of children in the IZ compared to most other areas across Aberdeenshire.

At 20.4% the number of older residents in the IZ is lower than most other areas of Aberdeenshire even with the spikes in population change among the 70+ age range.

In the three DZ's that have seen population decreases this is mostly down to a drop in children and working-class age groups.

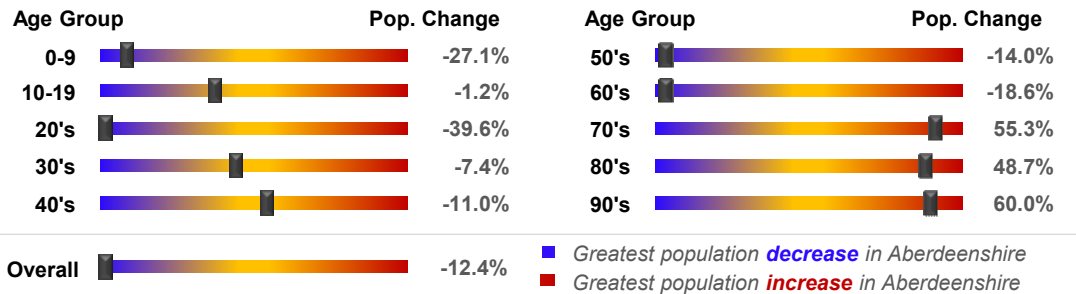

Population Change per Data Zone, 2014 & 2021

Data Zone	2014	2021	% Difference
S01007118	674	567	-15.9%
S01007119	779	662	-15.0%
S01007120	1053	966	-8.3%
Total	2506	2195	-12.4%

Patients hospitalised with coronary heart disease	443.7	50.8%		29.9%	Down	Rate per 100,000 pop.
Patients with emergency hospitalisations	7675.6	45.4%		6.1%	Up	Rate per 100,000 pop.
Premature births	10.1	0.9%		1.9%	Up	% of all live births
Uptake of the HPV vaccine in S3 girls	83.8	-5.6%		-1.1%	Down	% of S3 girls

Based on the 24 health-related indicators in the table, this IZ is situated at the more vulnerable end of the spectrum (5) in an Aberdeenshire context. The IZ fares slightly better when all IZs in Scotland are taken into consideration, but it is still in the bottom half nationally (36).

The area compares favourably to most other areas in Scotland in terms of range of health-related outcomes, particularly in relation to Healthy birth weight and Developmental concerns at 27-30 months..

Issues that may require further investigation include:

- Premature Births
- Child dental health in primary 1

With regards to each of the indicators listed above the IZ compares less favourably to other areas in Aberdeenshire and, in some instances, Scotland (and/or the trend is worsening).

Fraserburgh Lochpots Economic Data (1 of 3)

Rank of Household Income per Data Zone (2023)

In terms of household income, this IZ is among the poorest in Aberdeenshire. The median household income in 2023 equated to £24,861 which is £16,895 lower than the Shire average (£41,756).

Median household income ranges from £24,590 in DZ S01007119 to £25,468 in DZ S01007118.

Approximately 11.9% of households in this IZ earn less than £10,000 per year, which is higher-than-average (5.3%). This equates to roughly 117 households.

In addition, Approximately 1.7% of households in this IZ earn more than £100,000 per year, which is lower than average (10.1%). This equates to roughly 17 households.

Household Income per Data Zone (2023)

Fraserburgh Lochpots Economic Data (2 of 3)

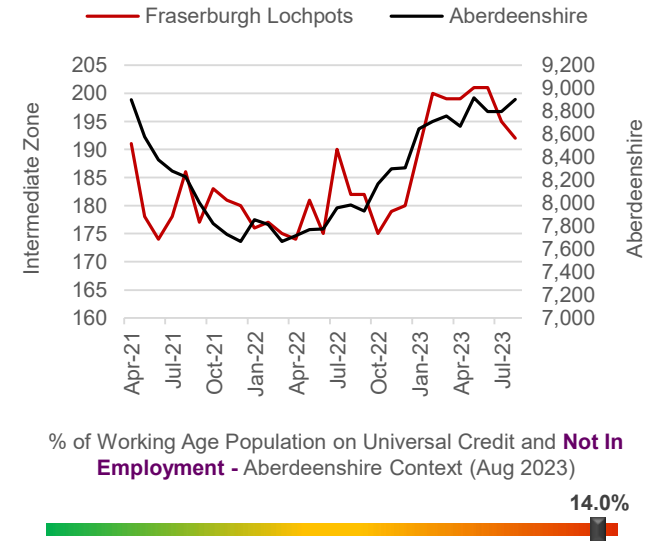

Latest Unemployment Rate - Ranking per Data Zone

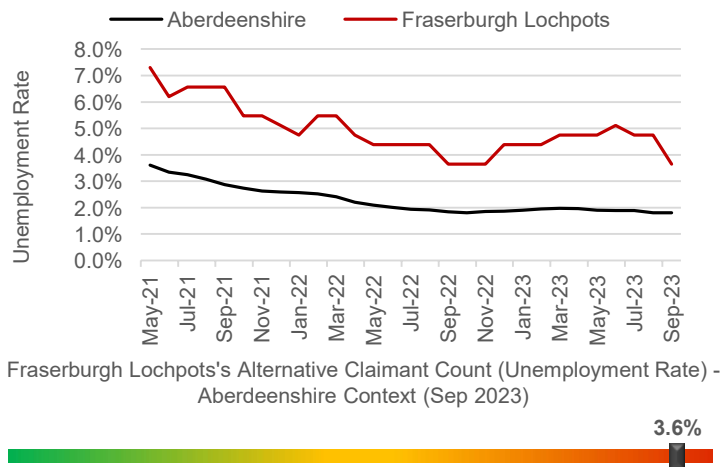

People on Universal Credit - In Employment

People on Universal Credit - Not In Employment

Alternative Claimant Count - Effective 'Unemployment Rate'

Children in Low Income Families

Summary

The number of people claiming Universal Credit (UC) - who are also in employment - has remained relatively steady over the last few months, contrary to the Shire-wide trend, which has increased. Latest figures show 11.6% of people aged 16-64 (who also have jobs) are claiming UC. This is towards the higher end of the spectrum in a Shire context. A similar picture emerges in relation to people on UC and not in employment.

Like Aberdeenshire, the unemployment rate in the IZ has fallen since the September 2020 peak of 3.8%. Latest data suggests approximately 3.6% of the Working Age population is currently out-of-work, which is double compared to the Aberdeenshire rate (1.8%).

Children living in low-income families are relatively uncommon. However, recent increases suggest the issue may be coming more to the fore over recent years, particularly since 2020/21.

People With No Qualifications, Census 2011

Relatively low Relatively high

% of Employees per Qualification Type

Summary

The employment numbers per broad industrial group relate to the kind of jobs within the area, which may be filled by those living outwith the IZ.

Major industries in terms of jobs in the area include the Education sector, the Health sector, and the Public Administration sector.

There has been a large growth in Agriculture and Manufacturing sector. Jobs in this latter industry have increased by 50% since 2020.

Even with the growth in these type of jobs, there has been a 3% decrease in jobs across the IZ between 2020 and 2022, suggesting the area is still feeling the effects post-Covid.

Fraserburgh Lochpots Other Socio-Economic Data

Geographic Access / Digital Connectivity / Food Vulnerability / Loneliness Proxy

Housing / Environment / Crime Rate / Educational Attainment

Summary

According to the miscellaneous socio-economic indicators on this page, the IZ appears to be well served in terms of households with access to a car or van, bus accessibility and average drive times by car or public transport, hence the low % of households with access to a car or a van. The availability of superfast broadband is high, yet the Digital Vulnerability Score suggests the skills to use the technology is low. The % of overcrowded households, % of total dwellings with Single Person Discounts and % of 16+ population in receipt of Housing Benefits are tending to be the higher end of the spectrum. The area is also home to a relatively high proportion of single person households, which may to some extent explain the lower-than-average household income in some of the DZ areas.
