I would like to raise the following concerns I have over the ~~following~~ new proposed distributor road running through the Hill of Banchory. We purchased our house in 2011 and at the time was unaware of any major road construction that would run directly through the woods behind our house. I feel the loss of this final remaining woodland area would have a detrimental impact on the health and well being of the local residence. Many local children play and walk in these woods and many local residents walk their dogs and enjoy the peace and quiet that the woods provide. Not only that but the destruction of the woods would also destroy the homes and habitat of red squirrels which we see on a regular basis, red kites and bats.

My main concern during the construction of the road would be the noise pollution, air pollution and light pollution. Not just from all the construction traffic but from the through traffic after the road has been completed.

Our house would then be situated between 2 main roads raising concerns over safety due to the traffic.

Having seen the plans and knowing that this isn't the only option, I feel the previously approved distributor road which doesn't run through protected woodland, and would cause far less emotional upset and loss of habitat, I reject the new proposed distributor road that is soon to be submitted by Banchory Planning Department.
